MAIL TO: PBMRC Trout Unlimited
 P.O. BOX 275
 HELENA, MT 59624

Thank you for joining the Pat Barnes Missouri River Chapter of Trout Unlimited.

About Trout Unlimited

For more than 50 years, Trout Unlimited has played the leading role in protecting one of America's last, great national treasures – our nation's trout and salmon fisheries. By combining “on the ground” restoration efforts, cutting-edge scientific research and effective advocacy on behalf of our coldwater fisheries, TU has been an effective steward for trout and salmon nationwide and in Canada.

About the Pat Barnes Missouri River Chapter of Trout Unlimited

For over 2 decades, the PBMRTU has been focused on effective conservation and restoration of the fisheries and habitats within the reaches of the upper Missouri, Smith and Little Blackfoot Rivers and their tributaries. We also sponsor and participate in local education programs that further Trout Unlimited's and the Chapter's mission. Our Chapter is named in memorial after the “Old Pro,” Pat Barnes who lived in Helena for most of his life with his wife and partner, Sig Barnes. Pat owned a fly shop and guide service in West Yellowstone for many years and taught thousands of people how to fly fish –and care for our watersheds. (That fly shop was purchased by Bob Jacklin, long time supporter of the PBMRTU). Pat and Sig are famously known for the effective fly, the Sofa Pillow, and for building a contraption out of a sewing machine that allowed them to tie two flies at the same time! Pat had a profound influence on many anglers and conservationists and we hope our TU Chapter named after him will continue that legacy. Find out how you can help at www.patbarnestu.org.

Please help in preventing the spread of non-native, invasive species on our rivers & riparian areas, which is one of the greatest threats to our fisheries today. Learn how to care for your waders, boots, boats and other fishing gear to reduce the chance of spreading Whirling Disease, New Zealand Mud Snails, Didymo and other *Aquatic Nuisance Species* from one body of water to another.

To learn how, visit the **Conservation Page** on www.CROSSCURRENTS.COM
